You may use this resource for personal and/or classroom use only. We're more than happy for you to keep your own backup copy though.

In order to support us, we ask that you always acknowledge www.twinkl.co.uk as the source of the resource. If you love these resources, why not let others know about Twinkl?

You must not reproduce or share this resource with others in any form. They are more than welcome to download the resource directly from us.

You must not host or in any other way share our resources directly with others, without our prior written permission.

We also ask that this product is not used for commercial purposes and also that you do not alter the digital versions of our products in any way.

We hope you enjoy the resource and we'll see you very soon! x

Human Skeleton Worksheet

Name: Date:

The body is made up of many bones called the skeleton. Bones are mainly made up of calcium. The skeleton protects the soft inner parts of the body. Muscles pull on parts of the skeleton to make the body move. A joint is where two bones meet. Some joints allow parts of the skeleton to bend. The skeleton provides the body with support and give it its shape.

Draw arrows to the correct part of the skeleton and label it.

- A. This bone protects the brain.**
- B. These bones protect the lungs.**
- C. This bone protects the heart.**
- D. This joint allows the leg to bend.**

Activity

Draw around your hand. Feel your bones and see if you can draw a map of the bones on your hand.
