Follow the steps to make your own card.

- If you have card making equipment like sticky pads and blank cards at home, you can use them.
- If you do not have that equipment you can use glue or sellotape and you can use a plain sheet of card or paper.
- For the decoration you can recycle old cards or draw pictures to cut out and stick.
- Look around your house and see what you can find. Be creative!
- Ask an adult to help or supervise.

Follow the steps to make your own card.

Take your plain card or paper and fold it in half, making sure that the corners match.

If you are using sticky pads, remember to remove the paper on the back.

Add sticky pads or glue to the back of the background piece.

Stick the back ground piece to the front of the card. Make sure all of the edges are straight to match the front of the card.

Take your chosen decoration and add glue to the back. Then stick the decoration to the centre of the card.

Bonus Question
When would you give somebody thank You card?

Good or Bad Quality
