

Class Endeavour

This term in cook it, we have enjoyed developing our basic cooking skills and have used them to create a variety of meals to eat with our families. We have also used our skills to make our own Christmas cakes that our families can enjoy over the holidays

In personal and social development we have been working on creating our own mini-enterprise project. We researched lots of different items and held a class vote to choose the most popular idea. We handmade all the cakes, drinks and decorations. We then hosted our Christmas café at the hub which was a great success!

In grow it we have been learning how to take care of the plants in the hub allotment. We have been preparing for winter by planting spring bulbs, collecting seeds and pruning the leaves. We have put all the waste into the compost heap so we can use it to fertilise our plants next year.
