## RUBRIC – KS3 Computing – Presentation Software (PowerPoint)

| Subject curriculum<br>intent:                                  |  |  |  |  |  |
|--|--|--|--|--|--|
|  | End of KS3 intent/outcome  |  |  |  |  |
| PowerPoints. They will<br>images to place them w               | s will understand how to use PowerPoint software to create their own presentation. Pupils will be able to add new slides to already created<br>be able to edit slides in relation to changing/adding words, inserting and changing images sourced from the internet and manipulating text boxes and<br>here they want them to go for aesthetics. Pupils will know how to save their work and open it in the correct way. They will develop their ability to<br>thers and be able to explain the basic content of their slides for information sharing. |  |  |  |  |
| Intent for this topic:   | In this module students will learn what presentation software is and how it is used to convey various forms of information. They will learn about the key differences between presentation, word processing and desk top publishing software. They will also create a presentation (using PowerPoint or Book Creator) which makes use of a wide variety of editing tools. The presentation content needs to be linked to another area of the curriculum (i.e. English, history, science etc) in order to help contextualise the use of ICT.            |  |  |  |  |
| Key vocabulary<br>taught within this<br>topic:                 | PowerPoint, edit, present, change, slide   |  |  |  |  |
